

TANGUDU BADRINADH

Computer Science & Data Science Student | Aspiring Developer

badrinadhtangudu1810@gmail.com | +91 83749 00618 | github.com/badrinadh-18 | linkedin.com/in/tangudu-badrinadh-583866368

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science and Data Science student with hands-on experience in Python, Java, C++, web development, and data analytics using Power BI. Built and deployed real-world projects including a full-featured invoice management web application. Passionate about learning Data Structures and Algorithms, MERN Stack development, Data Analytics, and AI/ML technologies. Eager to contribute to impactful projects while growing technical expertise.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript (beginner), HTML, CSS

Data Analytics & Visualization: Power BI, Microsoft Excel, Data Dashboards, KPI Analysis

Web Development: HTML5, CSS3, JavaScript, GitHub Pages, Responsive Design

Tools & Platforms: VS Code, Eclipse, Git, GitHub, Microsoft Office Suite

Currently Learning: MERN Stack, Data Structures & Algorithms (DSA), Machine Learning, Artificial Intelligence

PROJECTS

InvoiceHub — Bill & Invoice Management Web Application | Live: badrinadh-18.github.io/InvoiceHub

Tech Stack: HTML, CSS, JavaScript, GitHub Pages

- Designed and developed a fully functional invoice management system deployed on GitHub Pages for a real business (Ragunadham Enterprises).
- Implemented features including auto-numbered bill generation, buyer details management, dynamic item entry with quantity and pricing, and grand total calculation.
- Built a real-time dashboard displaying total bills, total revenue, and monthly bill count with persistent local data storage.
- Integrated print and PDF download functionality for invoices, enabling seamless bill sharing and record-keeping.
- Developed search and filter capabilities across all saved bills for quick retrieval.

Business Analytics Dashboard — Power BI

Tech Stack: Power BI, Microsoft Excel

- Created an interactive business analytics dashboard using Power BI integrated with Excel datasets.
- Designed KPI cards and visual trend charts to present business metrics in a clear, decision-friendly format.
- Performed data cleaning and transformation in Excel to ensure accurate and reliable dashboard output.

Developer Portfolio Website | Live: badrinadh-18.github.io/portfolio

Tech Stack: HTML5, CSS3, GitHub Pages

- Built and deployed a responsive personal portfolio website showcasing projects, skills, and education.
- Implemented structured multi-section layout with smooth navigation, contact form links, and dark/light mode toggle.

EDUCATION

B.Tech – Computer Science and Data Science

2022 – Present

Aditya Institute of Technology and Management **CGPA: 7.9**

Intermediate (12th Grade) – MPC

2022

Board of Intermediate Education, Andhra Pradesh **Score: 88%****SSC (10th Grade)**

2020

Board of Secondary Education, Andhra Pradesh **Score: 71%****AREAS OF INTEREST & LEARNING GOALS**

Actively developing skills in the following domains:

- Data Analytics — statistical analysis, data visualization, business intelligence using Power BI and Excel.
- MERN Stack Development — MongoDB, Express.js, React.js, Node.js for full-stack web applications.
- Data Structures and Algorithms (DSA) — problem-solving, algorithmic thinking, competitive programming.
- Artificial Intelligence & Machine Learning — exploring ML algorithms, predictive modeling, and data-driven solutions.

KEY STRENGTHS

- Self-motivated learner with ability to build and deploy real-world projects independently.
- Strong foundation in object-oriented programming across multiple languages (Python, Java, C++).
- Experience turning raw data into actionable insights through visualization and dashboard creation.
- Good communication skills; comfortable collaborating and presenting technical work.
